Why Choose a RIB?

RIBs (Rigid Inflatable Boats) are constructed with a conventional planning hull manufactured out of fiber-glass with an inflatable collar for increased buoyancy and stability. The collar (or TUBE) acts as a shock absorber ensuring that the craft has unparalleled seaworthiness, safety and stability. RIBs are used around the world by Military, First Responder, Commercial and Recreational users.

Safety of a RIB

We rigorously test each boat before introduction in the market. Some examples of tests to name a few: All people on 1 side of the boat at full load • Towing the boat at full load • Full speed turns in 100 meter for maneuverability • Flotation without air in the tubes at full load.

Included Equipment and Features

- Commercial structure
- Tube material Spec Hypalon 1670 DTEX with 7 air compartments and inflation valves.
- Tube diameter 550 mm
- Fiberglass hull in white color or customer choice.
